

THE DESIGN AND EVALUATION OF INNOVATION POLICY (DEIP)

Universidad del Pacifico, Lima

February 27- March 3, 2017

DRAFT BIO OF LECTURERS (TBC)

Dr. Gustavo Crespi

Gustavo Crespi is a Lead Specialist in the Competitiveness and Innovation Division in the Inter-American Development Bank. He also served as Senior Program Officer at the International Development Research Centre (IDRC) of Canada. He holds a PhD in Science and Technology Policy Studies from Sussex University (SPRU), a Masters in Economic Development and International Trade, from the School of Economics and Business Administration of University of Chile, and a BA in Economics from the National University of Cordoba, Argentina. His interests include Industrial Development, Technological Change, Industrial Structure and Development of the Firm and Management and Technology Policy Evaluation, especially in developing countries. He has written and published numerous articles on those topics in journals such as World Development, Research Policy, Industrial and Corporate Change, Journal of Technology Transfer, Oxford Review of Economic Policy, Technovation, Small Business Economics, among others. Crespi is a member of the Editorial Board of Journals: Policy Research and The International Journal of Learning Technology, Innovation and Development.

Prof. Gabriela Dutrénit

Gabriela Dutrénit is an economist with a PhD in Science and Technology Research Studies from the Science Policy Research Unit (SPRU), University of Sussex, UK. She is a professor in the Master's and PhD Program in Economics and Innovation Management at the Universidad Autónoma Metropolitana (UAM), Mexico. She is a member of the National System of Researchers and a regular member of the Mexican Academy of Science. She is a member of the Scientific Committee of the Global Network for Economics of Learning, Innovation, and Competence Building Systems (Globelics), and coordinator of the Latin American Chapter of this network, LALICS (Latin American Network for Economics of Learning, Innovation, and Competence Building Systems). From July 2012, Dr. Dutrénit is the General Coordinator of the Scientific and Technological Advisory Forum in Mexico. This organism was created by the 2002 Science and Technology Law to represent the Science, Technology and Innovation communities and act as an autonomous and permanent advisory organism to the Executive and the Legislative Branches concerning the design of policies and the budget negotiation of this sector. Gabriela Dutrénit's research interests include: innovation and development, in particular learning and technological capability accumulation at the firm level; university–industry linkages; research and development (R&D) and innovation policy. She has coordinated several evaluations of the Mexican policy of science, technology and innovation.

Dr. Michiko Iizuka

Michiko Iizuka has been a research fellow at UNU-MERIT since 2008, specialising in the economics of innovation and technology. She conducts research into innovation systems and policy in developing countries; innovation in areas of agriculture, natural resources and environmental technology; and the impact of global institutions such as standards and global agreements on local capacity building. She has been the coordinator of the 'Design and Evaluation of Innovation Policy' (DEIP) training course for policymakers in developing countries since 2013. She holds a DPhil from the Science Policy Research Unit (SPRU) and an MPhil from the Institute of Development Studies (IDS), both at the University of Sussex, UK.

Juana Kuramoto Huamán

Associated Researcher, Grupo de Analisis para el Desarrollo (GRADE)

Juana Kuramoto received a Master's Degree in Public Policy from the University Carnegie Mellon in 1995. She pursued doctoral studies at the program in Policy Studies and Technological Change at the University of Maastricht.

Ms. Kuramoto has a long experience in research and consulting in the areas of technological innovation, scientific and technological policy, and mining. She also has worked for the National Council for Science, Technology and Innovation in Peru.

Ms. Kuramoto specific expertise relates to, on the one hand, the design and formulation of science, technology and innovation policy and programs. On the other, relates to the impact of mining on local and regional development, small-scale mining, citizen participation in environmental management of mining and innovations in mining technology.

Prof. Pierre Mohnen

Pierre Mohnen is Professor of microeconomics of technical change at Maastricht University, a Professorial Fellow at UNU-MERIT Associated Fellow at CIRANO, Canada, and Senior Research Associate at the Technology and Management for Development Center at Oxford University. He has an MA in economics from the Catholic University of Louvain and a PhD in economics from New York University. His research deals mainly with the measurement, the determinants, the effects and the interrelationships of R&D, innovation, ICT, competition and productivity, and the effectiveness of innovation, environmental and social policies. He currently coordinates the economics of knowledge and innovation research theme at UNU-MERIT and sits on various scientific/advisory committees (ZEW, Wissenschaftsstatistik GmbH, i4g group

at Directorate General of Research of the European Commission). He has done consulting work for the OECD, the European Commission, the Inter-American Development Bank, UNICEF and government departments in Canada, Europe and Chile.

Inti Núñez

Inti Núñez is currently the Head of Entrepreneurship Department at CORFO, Chile. He obtained his BA degree as agronomist from the Pontifical Universidad Católica de Chile. He also holds an MBA from the Universidad Adolfo Ibáñez, and a MSc in Public Policies of Science, Technology and Innovation from the University of Sussex, England. He served as assistant professor at the Adolfo Ibáñez University (UAI) Business School for 4 years, and he was also the Executive Director of the CIET UAI and founder of the COMPITE +1000 program of the same university. He has been working for more than 10 years in public administration: as Executive Secretary of the Interministerial Committee for Innovation, Chief of the Innovation Division of the Ministry of Economy of Chile, Assistant Director of Entrepreneurship of INNOVA Chile, Counselor of FONTEC , Executive Director of the Chile-

Sweden Fund, and Regional Director CORFO Region of Aysén. He also served as Director of the SERCOTEC and of INNOVA Chile. He has been a consultant and adviser to national and international institutions and important companies in Chile.

Prof. Roberta Rabellotti, Pavia University

Full Professor of Economics at the Università di Pavia, Italy. She has got a Master of Science in Development Economics at the University of Oxford and a Doctor of Philosophy at the Institute of Development Studies, University of Sussex.

She specializes in the analysis of the industrial sector in developing countries. Her areas of interest are: industrial policies, small business promotion, international trade policies, industrial districts and clusters, global value chains.

Prof. Rabellotti has working experience with the Inter-American Development Bank, European Union, UNIDO, ILO, ECLAC-UN, UNCTAD.

Her publications include books with Harvard University Press, MacMillan and Edward Elgar as well as numerous articles in peer-reviewed journals.

Dr. David Robinson

School of Northern Development, Laurentian University

Dr David Robinson is an economist in the School of Northern Development at Laurentian University. He played a leading role in identifying and promoting the mining supply and services sector in Sudbury Ontario, and in creating Laurentian's new School of Architecture. He has written a book on game theory and one on the economics of community forestry, as well as over 200 columns on economic issues in the popular press. His current research focus is on Northern Ontario development and the economics of climate change.
