

Lista de Referencias
Taller CIES

1 Información General

Nombre del Taller: Econometría de Series de Tiempo
Profesor Gabriel Rodríguez (Pontificia Universidad Católica del Perú)

2 Referencias

La econometría ha evolucionado de manera importante en los últimos 15-20 años y consecuentemente debemos hacer algunas priorizaciones debido al corto tiempo del curso. Una lista de referencias (no exhaustiva) es otorgada con la finalidad de completar detalles o profundizar en ciertos temas de mayor interés del estudiante. Ningún libro es obligatorio como manual del curso. Sin embargo, el material dictado en las clases teóricas y prácticas es el material fundamental para la comprensión y el éxito del curso. A continuación se presenta una lista de referencias (libros y papers). Es necesario notar que la lista de papers incluye aplicaciones empíricas en la mayoría de los casos.

2.1 Libros

1. Anderson, T. W. (1971), *The Statistical Analysis of Time Series*, John Wiley & Sons.
2. Banerjee, A., J. J. Dolado, J. W. Galbraith and D. F. Hendry (1993), *Cointegration, Error Correction and the Econometric Analysis of Non Stationary Data*, Oxford University Press.
3. Davidson, R. and J. G. MacKinnon (1993), *Estimation and Inference in Econometrics*, Oxford University Press.
4. Enders, W. (2004), *Applied Econometric Time Series*, John Wiley Second Edition.
5. Franses, P. H. (1999), *Time Series Models for Business and Economic Forecasting*, Cambridge University Press.
6. Granger, C. W. J. and T. D. Teräsvirta (1993), *Modelling Nonlinear Economic Relationships*, Advanced Texts in Econometrics, Oxford: Oxford University Press.

7. Hamilton, J. D. (1994), *Time Series Analysis*, Princeton University Press.
8. Harvey, A. C. (1981), *Time Series Models*, MIT Press.
9. Harvey, A. C. (1999), *Forecasting, Structural Time Series Models and the Kalman Filter*, Cambridge University Press.
10. Hatanaka, M. (1998), *Time Series-Based Econometrics*, Oxford University Press.
11. Hendry, D. F. (1997), *Dynamic Econometrics*, Oxford University Press.
12. Johansen, S. (1999), *Likelihood-Based Inference in Cointegrated Vector Autoregressive Models*, Oxford University Press.
13. Juselius, K. (2006), *The Cointegrated VAR Model: Methodology and Applications*, Oxford University Press
14. Kim, Ch.-J. and Ch. R. Nelson (1999), *State-Space Models with Regime Switching*, MIT Press.
15. Maddala, G. S. and I. M. Kim (1998), *Unit Roots, Cointegration and Structural Change*, Cambridge University Press.
16. Mills, T. C. (1990), *Time Series Techniques for Economists*, Cambridge University Press.
17. Mills, T. C. (1993), *The Econometric Modelling of Financial Time Series*, Cambridge University Press.
18. Winkelmann, R. (2008), *Econometric Analysis of Count Data*, 5ta Edición, Springer.
19. Wooldridge, J. M. (2000), *Introduction to Econometrics, A Modern Approach*, South-Western College Publishing, Thompson Learning.

2.2 Papers

2.2.1 Tests de Raiz Unitaria

1. Banerjee, A., R. Lumsdaine, and J. H. Stock (1992), “Recursive and Sequential Tests of the Unit Root and Trend Break Hypothesis,” *Journal of Business and Economic Statistics* **10**, 271-288.
2. Campbell, J. Y. and P. Perron (1991), “Pitfalls and Opportunities: What Macroeconomists Should Know About Unit Roots,” in *NBER Macroeconomics Annual*, O. J. Blanchard and S. Fisher, Editors, Vol. 6, 141-201.
3. Christiano, L. (1992), “Searching for Breaks in GNP,” *Journal of Business and Economic Statistics* **10**, 237-250.
4. Elliott , G., T. J. Rothenberg and J. H. Stock (1996), “Efficient Tests for an Autoregressive Unit Root,” *Econometrica* **64**, 813-836.

5. Niels Haldrup, and Morten Ørregaard Nielsen, 2007, “Estimation of Fractional Integration in the Presence of Data Noise”, *Computational Statistics and Data Analysis* **51**, 3100-3114.
6. Kwiatkowski, D., P. C. B. Phillips, P. Schmidt, and Y. Shin (1992), “Testing the Null Hypothesis of Stationarity against the Alternative of a Unit Root: How sure are we that economic time series have a unit root,” *Journal of Econometrics* **54**, 159-178.
7. Nelson, C. R. and C. I. Plosser (1982), “Trends and Random Walks in Macroeconomic Time Series: Some Evidence and Implications,” *Journal of Monetary Economics* **10**, 139-162.
8. Ng, S. and P. Perron (1995), “Unit Root tests in ARMA Models with Data Dependent Methods for the Selection of the truncation Lag,” *Journal of the American Statistical Association* **90**, 268-281.
9. Ng, S. and Perron, P. (2001), “Lag Length Selection and the Construction of Unit Root Tests with Good Size and Power,” *Econometrica* **69**, 1519-1554.
10. Perron, P. (1989), “The Great Crash, the Oil Price Shock and the Unit Root Hypothesis,” *Econometrica* **57**, 1361-1401.
11. Perron, P. (1990), “Testing for a Unit Root in a Time Series with a Changing Mean,” *Journal of Business and Economic Statistics* **8**, 153-162.
12. Perron, P. (1994), “Trend, Unit Root and Structural Change in Macroeconomic Time Series,” in *Cointegration for the Applied Economist*, B. B. Rao (Editor), Macmillan Press, 113-146.
13. Perron, P. (1997), “Further Evidence on Breaking Trend Functions in Macroeconomic Variables,” *Journal of Econometrics* **80**, 355-385.
14. Perron, P. and S. Ng (1996), “Useful Modifications to Some Unit Root Tests with Dependent Errors and their Local Asymptotic Properties,” *Review of Economic Studies* **63**, 435-463.
15. Perron, P. and G. Rodríguez (2003), “Efficient Unit Root Tests and Structural Change,” *Journal of Econometrics* **115**, 1-27.
16. Perron, P. and G. Rodríguez (2003), “Searching for Additive Outliers in Nonstationarity Time Series,” *Journal of Time Series Analysis*, **24**(2), 193-220.
17. Perron, P. and T. Vogelsang (1992), “Nonstationarity and Level Shifts with an Application to Purchasing Power Parity,” *Journal of Business and Economic Statistics* **12**, 471-478.
18. Phillips, P. C. B. and P. Perron (1988), “Testing for a Unit Root in Time Series Regression,” *Biometrika* **75**, 335-346.
19. Phillips, P. C. B. and Z. Xiao (1998), “A Primer on Unit Roots,” *Journal of Economic Surveys*, **12 (5)**, 423-469.

21. Said, S. E. and D. A. Dickey (1984), “Testing for Unit Root in Autoregressive-Moving Average Models of Unknown Order,” *Biometrika* **71**, 599-607.
22. Stock, J. H. (1994), “Unit Roots and Trend Breaks,” in *Handbook of Econometrics*, Vol. 4, R. F. Engle and D. MacFaden, Editors, Elsevier.
23. Vogelsang, T. J. (1999), “Two Simple Procedures for Testing for a Unit Root when there are Additive Outliers,” *Journal of Time Series Analysis* **20**, 237-252.
24. Zivot, E. and D. W. Andrews (1992), “Further Evidence on the Great Crash, the Oil Price Shock and the Unit Root Hypothesis,” *Journal of Business and Economic Statistics* **10**, 251-270.

2.2.2 Modelos VAR

1. Blanchard, O. J. and D. Quah (1989), “The Dynamic Effects of Aggregate Demand and Supply Disturbances,” *American Economic Review* **79**, 655-673.
2. Bernanke, B. (1986), “Alternative Explanations of the Money-Income Correlation,” *Carnegie Rochester Conference Series on Public Policy* **25**, 45-49.
3. Galí, J. (1992), “How well does the IS-LM Model Fit Postwar Data?,” *Quarterly Journal of Economics* **107**, 709-735.
4. Lutkepohl, H. (1999), “Vector Autoregression,” Unpublished manuscript, Institut für Statistik und Okonometrie, Humboldt-Universität Zu Berlin.
5. Watson, M. W. (1994), “Vector Autoregression and Cointegration,” in *Handbook of Econometrics*, Vol. 4, R. F. Engle and D. MacFaden, Editors, Elsevier.

2.2.3 VAR y Cointegracion

1. Engle, R. F. and C. W. J. Granger (1987), “Co-Integration and Error Correction: Representation, Estimation and Testing,” *Econometrica* **55**, 251-276.
2. Granger, C. W. J. and P. Newbold (1974), “Spurious Regression in Econometrics,” *Journal of Econometrics* **2**, 111-120.
3. Hansen, B. E. (1992), “Efficient Estimation and Testing of Cointegration Vectors in the Presence of Deterministic Trends,” *Journal of Econometrics* **53**, 87-121.
4. Hubrich, K., H. Lütkepohl and P. Saikkonen (1998), “A Review of Systems Cointegration Tests,” Unpublished manuscript, Institut für Statistik und Okonometrie, Humboldt-Universität Zu Berlin.
5. Johansen, S. (1988), “Statistical Analysis of Cointegration Vectors,” *Journal of Economics, Dynamics and Control* **12**, 231-254.

6. Johansen, S. (1991), “Estimation and Hypothesis Testing of Cointegration Vectors in Gaussian Vector Autoregressive Models,” *Econometrica* **59**, 87-121.
7. Johansen, S. and K. Juselius (1990), “Maximum Likelihood Estimation and Inference on Cointegration with an Application to the Demand for Money,” *Oxford Bulletin of Economics and Statistics* **52**, 169-210.
8. Johansen, S. and K. Juselius (1992), “Testing Structural Hypotheses in a Multivariate Cointegration Analysis of the PPP and the UIP for UK,” *Journal of Econometrics* **53**, 221-244.
9. King, R., C. I. Plosser, J. H. Stock and M. W. Watson (1991), “Stochastic Trends and Economic Fluctuations,” *American Economic Review* **81**, 819-840.
10. Perron, P. and G. Rodríguez. (2002), “Residual-Based Tests for Cointegration with GLS Detrended Data,” manuscript.
11. Phillips, P. C. B. and S. Ouliaris (1990), “Asymptotic Properties of Residual Based Tests for Cointegration,” *Econometrica* **58**, 165-193.
12. Stock, J. H. (1987), “Asymptotic Properties of Least Squares Estimates of Cointegration Vectors,” *Econometrica* **55**, 1035-1056.
13. Stock, J. H. (1999): “A Class of Tests for Integration and Cointegration,” in Engle, R.F. and H. White (eds.), *Cointegration, Causality and Forecasting. A Festschrift in Honour of Clive W.J. Granger*, Oxford University Press, 137-167.
14. Stock, J. H. and M. W. Watson (1989), “Testing for Common Trends,” *Journal of the American Statistical Association* **83**, 1097-1107.
15. Sims, C. A., J. H. Stock and M. W. Watson (1990), “Inference in Linear Time Series Models with some Unit Roots,” *Econometrica* **58**, 113-144.
16. Watson, M. W. (1994), “Vector Autoregression and Cointegration,” in *Handbook of Econometrics*, Vol. 4, R. F. Engle and D. MacFaden, Editors, Elsevier.

2.2.4 Volatilidad: Modelos ARCH, GARCH y otros

1. Bollerslev, T. (1986), “Generalised Autoregressive Conditional Heteroskedasticity,” *Journal of Econometrics* **31**, 307-27.
2. Engle, R. F. (1982), “Autoregressive Conditional Heteroscedasticity with Estimates of the Variance of United Kingdom”, *Econometrica* **50** (4), 987-1007.
3. Nelson, D. B. (1991), “Conditional Heteroskedasticity in Asset Returns,” *Econometrica* **59**, 347-370.

2.2.5 Forma Espacio Estado, Filtro de Kalman y Descomposición de Tendencia y Ciclo

1. Beveridge, S. and C. R. Nelson (1981), “A New Approach to Decomposition of Economic Time Series into Permanent and Transitory Components with particular attention to measurement of the business cycle,” *Journal of Monetary Economics* **7**, 151-174.
2. Clark, P. K. (1987), “The Cyclical Component of U.S. Economic Activity,” *Quarterly Journal of Economics* **102**, 798-814.
3. Engle, R. F. and M. W. Watson (1987), “The Kalman Filter: Applications to Forecasting and rational Expectations Models,” In *Advances in Econometrics*, Vol. 1, Fifth World Congress, T. F. Bewley (Editor), Econometric Society Monograph # 13, 245-285 (more references in this paper).
4. Harvey, A. C. (1987), “Applications of the Kalman Filter in Econometrics,” in *Advances in Econometrics*, Vol. 1, T. F. Bewley (Editor), Econometric Society Monograph # 13, 285-313.
5. Rodríguez, G. (2005), “Estimates of Permanent and Transitory Components for Canadian Regions using the Friedman’s Plucking Model of Business Fluctuations,” *Canadian Journal of Regional Science* **27** (1), 61-78.
6. Kim, C.-J. and C. R. Nelson (1999), “Friedman’s Plucking Model of Business Fluctuations: Tests and Estimates of Permanent and Transitory Components,” *Journal of Money, Credit and Banking* **31**, 317-334.
7. Mills, T. C. and P. Wang (2002), “Plucking Models of Business Cycle Fluctuations: Evidence from the G-7 Countries,” *Empirical Economics* **25**, 225-276.

2.2.6 Introducción a Modelos No Lineales I: Modelos Markov-Switching

1. Goodwin, T. H. (1993), “Business-Cycle Analysis with a Markov-Switching Model,” *Journal of Business and Economic Statistics* **11**, 331-339.
2. Hamilton, J. D. (1989), “A New Approach to the Economic Analysis of Nonstationary Time Series and the Business Cycle,” *Econometrica* **57**, 357-384.
3. Lam, P. S. (1990), “The Hamilton Model with a General Autoregressive Component: Estimation and Comparison with Other Models of Economic Time Series,” *Journal of Monetary Economics* **26**, 409-432.

2.2.7 Introducción a Modelos No Lineales II: Modelos “Smooth Transition Autoregressive” (STAR)

1. Dijk, D. V., T. Teräsvirta and P. H. Franses (2002), “Smooth Transition Autoregressive Models-A Survey of Recent Developments,” *Econometric Reviews* **21**, 1-47.

2. Rodríguez, G., and M. Sloboda (2005), “Modeling Non-Linearities in Quarterly Revenues of U. S. Telecommunications Industry,” *Structural Change and Economic Dynamics* **16**, 137-158.
3. Teräsvirta, T. (1998), “Modelling Economic Relationships with Smooth Transition Regressions,” in A. Ullah and D. E. A. Giles (Eds.), *Handbook of Applied Economic Statistics*, New York: Marcel Dekker, 507–552.
4. Teräsvirta, T. and H. M. Anderson (1992), “Characterizing Nonlinearities in Business Cycles using Smooth Transition Autoregressive Models,” *Journal of Applied Econometrics* **7**, S119-S136.
